RE: Complete Summary Appraisal Report
Subject: Five (5) Tracts of Vacant Land & Two (2) Improved Tracts
Teton County, Idaho

Dear Commissioners:

At your request, I have performed an update appraisal analysis on the properties above. I have reviewed the market for recent sales of properties in the area in order to perform this analysis. Based on my investigation, I conclude that some of the properties have increased in value. The following is a conclusion of my analysis:

Parcel 1: 160-Acre Tract: Increased or \$2,125 per acre or \$1,940,000 / \$12,125 per Acre

Parcel 2: 8.25-Acre Tract: No Change In Value

Parcel 3: **8.50-Acre Tract: No Change In Value**

Parcel 4: 16.50-Acre Tract: No Change In Value

Parcel 5: 2-Acre Tract: No Change In Value

Improved Parcel 1(County Court House): Increase In Value from \$600,000 to \$724,000.

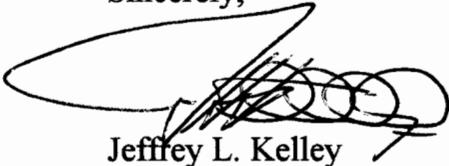

Improved Parcel 2 (County Shed Property): No Change In Value

Our analysis indicates that land values in the Packsaddle area have increased due to a recent sale in that area. As a result, Parcel #1 has been increased \$2,125 per acre. However, recent data in the other areas indicate our values from last spring have not changed.

We have investigated sales in the downtown area of Driggs. We found one sale that is pending. If this property is to close, it will indicate land values in the area are increasing. Since the property had not closed, we have not completely tied our value to it. Nevertheless, we conclude the courthouse has an increase in value of at least 20% because of pending sales and offers in the area. Therefore, we conclude it has a current value of \$724,000. We found that there has been no change in value to the County Shed property.

The update values above are based on an effective date of September 25, 2006. We will keep in our file a copy of the sales used to arrive at these update opinions. If the county would like, we could prepare a formal addendum to the summary appraisals reports completed last spring.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeffrey L. Kelley". The signature is stylized with several loops and a long horizontal stroke extending to the left.

RE: Complete Summary Appraisal Report

Subject: Five (5) Tracts of Vacant Land

Parcel 1: 160-Acre Tract, N $\frac{1}{2}$ S $\frac{1}{2}$, Sec. 3, T. 5 N., R. 44 E.B.M.

Parcel 2: 8.25-Acre Tract, A Portion of the SW $\frac{1}{4}$, Sec. 6, T. 5 N., R. 46 E.B.M.

Parcel 3: 8.50-Acre Tract, A Portion of NW $\frac{1}{4}$, SE $\frac{1}{4}$, Sec. 36, T. 5 N., R. 45 E.B.M.

Parcel 4: 16.50-Acre Tract, Tax #1430 & #2873, Sec. 35, T. 4 N., R. 45 E.B.M.

Parcel 5: 2-Acre Tract, Portion SE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 34, T. 4 N., R. 45 E.B.M.

Teton County, Idaho

Dear Commissioners:

As requested, I have made a careful, personal inspection of the above referenced parcels. I have also prepared a Complete Summary Appraisal Report, wherein I have provided you with my opinion of the *market value* of each parcel in its present condition.

Market Value is defined as "the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus." Implicit in this definition are various conditions that can be found in the full Market Value definition, which is set forth in the report.

I have prepared this appraisal for you as a representative of the Teton County Commissioner's Office. It has been reported that the Commissioner plans to use this appraisal to establish a value for land that will eventually be traded in the future. ***The use of this appraisal by anyone other than the Commissioners, their associates, accountants or counsel is strictly prohibited. Furthermore, this appraiser assumes no one, except the Teton County Commissioners will rely upon the content and opinions of value herein.***

I have prepared this appraisal in compliance with the current edition of the Uniform Standards of Professional Appraisal Practice (USPAP). At your request, I have prepared a Complete Summary Appraisal Report. In this report, I have considered the Cost, Sales Comparison and Income Approaches. However, I have only used the Sales Comparison Approach because the properties being appraised are vacant tracts of land.

Based on my inspection, study and review of the market, it is my opinion that the market value of the subject parcels, as of March 3, 2006, is as follows:

CALLED AS FOLLOWS: 09-28-2006
Parcel 1: ~~\$1,600,000~~ Revised \$1,940,000
Parcel 2: \$124,000
Parcel 3: \$85,000
Parcel 4: \$231,000
Parcel 5: \$58,000

Sincerely,

Jeffrey L. Kelley,
Appraiser, Idaho CGA #362

PARCEL 3 (8.50-ACRE TRACT OF LAND):

SUMMARY OF SALIENT FACTS AND CONCLUSIONS:

Owner of Record: Teton County is the recorded owner of this parcel of land. They have held title to it for more than five (5) years.

Location: This parcel is found east of City of Driggs' Public Works property, which is at 325 South 5th East, in Driggs, Idaho.

Legal Description: Township 5 North, Range 45 East of the Boise Meridian.
Section 36: Portion of NW¼, SE¼

Land Size: 8.50 Acres

Description: This a partially depleted gravel pit lying north of Teton Creek. Its topography is level to undulating with the subject being 10 feet below the level of the adjoining land.

Zoning Designation: ADR 1.0

Flooding Designation: A portion of this parcel may be found within the 100-year flood plain on the FEMA flood plain Map. This information was confirmed by Community Panel 16066.

Improvements: None

Highest and Best Use: Gravel pit or open space land.

Valuation Date: March 3, 2006

Estimate of Value: \$85,000 or \$10,000 per acre

PURPOSE AND INTENDED USE OF THE APPRAISAL:

Purpose of the Appraisal: This appraisal is a market analysis of five (5) tracts of vacant land that are owned by Teton County. This analysis is based on the highest and best use of these parcels in their present “as is” condition. It is an appraisal of their “fee simple” title. The effective date of these appraisals is March 3, 2005.

Each parcel has been appraised separately. No assumptions or extraordinary conditions, other than those stated below, have been made in preparing these appraisals.

Intended User: Roger Hoopes of the Teton County Commissioner’s Office has asked our firm to prepare these appraisals. They are considered the client of this report. The County Commissioners and possibly the Huntsman Groups are the intended users of this document.

Intended Use: The Teton Commissioner’s Office and the Huntsman Group plan to use these appraisals as a base value for trading property in the future.

SCOPE OF THE APPRAISAL:

The client has requested that a market analysis be performed on five (5) tracts of vacant land owned and operated by Teton County. The properties are scattered throughout the Teton Basin. The appraisal is to be based on the highest and best use of each parcel in its present “as is” condition. The “fee simple” title of each parcel is to be appraised.

Each parcel has been appraised separately. Some assumptions and extraordinary conditions have been made in appraising these properties. These assumptions and conditions are listed below. The effective date of these appraisals is March 3, 2006, or the last date of my inspection of them.

A Complete Appraisal on each parcel has been performed. In this appraisal, the three (3) standard appraisal methods of valuation have been employed. They are the Cost, Sales Comparison and Income Approaches. However, only the Sales Comparison Approach has been used. The Cost and Income Approaches were not used because all of the parcels are vacant tracts of land.

The sales used in the analysis have all been confirmed and verified. They have been confirmed by the seller, the buyer or through the local Multi-listing service. I have verified all closed transaction with a Warranty Deed. These deeds will remain in my file, which I will keep in house for 5 or more years.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS:

[REDACTED]

- [REDACTED]

- [REDACTED]

- [REDACTED]

[REDACTED]

- [REDACTED]

- [REDACTED]

- [REDACTED]

Parcel 3:

The appraisal of this parcel is subject to the following assumptions and limiting conditions:

- This parcel does not have any legal access. According to the Mayor Driggs, this property is land-locked. The Mayor hopes to convince the adjacent property owner to put a street across their property when they develop it, so this parcel will have access. However, at the present time, it has no access.
- This appraisal assumes that this parcel does not contain any latent environmental issues that will affect its value. I was unable to find any obvious environmental concerns on the property. However, my inspection of it was cursory in nature. Furthermore, I am not a qualified environmental auditor.
- The flood plain map indicates land in the area is within the 100-year flood plain. However, there is no specific delineation showing how much, if any, of the property is within this plain. The appraiser, however, is aware that this parcel does sub during a normal spring runoff.

- [REDACTED]
- [REDACTED]
 - [REDACTED]
 - [REDACTED]
 - [REDACTED]

EXPOSURE TIME:

Parcel 1 would have an exposure time of less than one (1) year at the opinion of value stated herein. Parcel 2 would have a similar exposure time based on the high demand for home sites in the view corridor. Parcel 3 would have a lengthy exposure time of a one year or more because its potential market is limited to the property owners surrounding it. Parcel 4 would have an exposure time of one year or more because of its unique condition as a mostly depleted gravel pit. Finally, Parcel 2 would have an exposure time of less than 6 months based on the extraordinary assumption that it can be used as a home site.

ESTATE TO BE APPRAISED:

The estate to be appraised is the “fee simple title” of each parcel in its “as is” condition. The term “fee simple,” suggests that each parcel is not encumbered by any other interests, but only subject to easements, recorded right-of-ways and the four (4) powers of government— eminent domain, escheat, taxation and police power. The term “as is,” refers to the legal and physical condition of the parcel in its relationship to its highest and best use as of the *effective date* of this appraisal.

INSPECTION OF THE PROPERTY:

I inspected each parcel on several occasions. My last inspection occurred on March 3, 2006. I made a complete and thorough inspection of each parcel at that time. The photographs herein were taken then. *The effective date of this appraisal is March 3, 2006.*

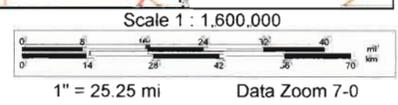

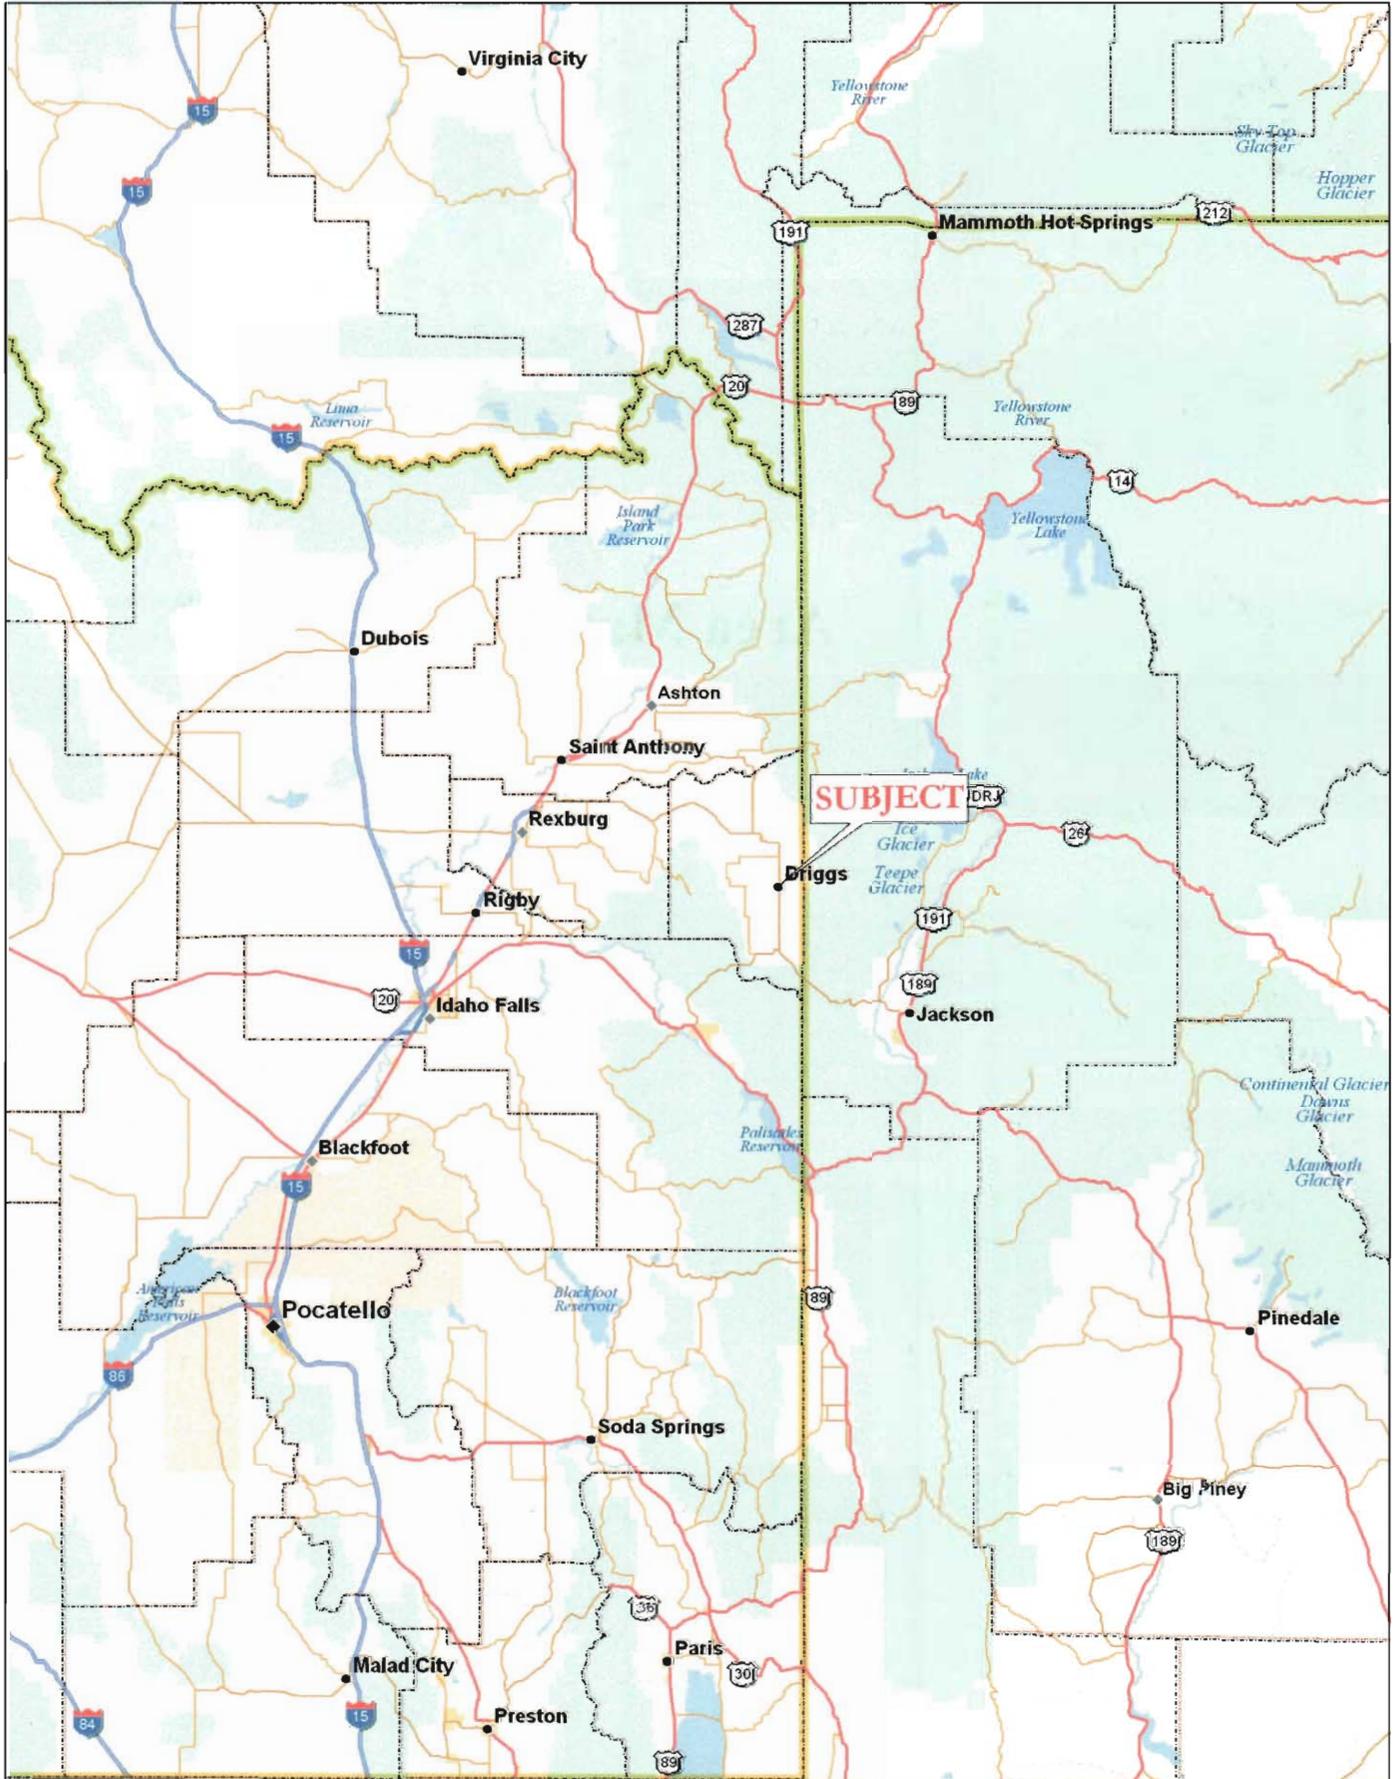

DEFINITIONS USED IN THIS APPRAISAL:

1. **Market Value:** The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as a specified date and the passing of title from seller to buyer under conditions whereby:
 - (a) Buyer and seller are typically motivated;
 - (b) Both parties are well informed or well advised and both acting in what they consider their own best interest;
 - (c) A reasonable time is allowed for exposure in the open market;
 - (d) Payment is made in terms of cash in U.S. dollars, or in terms of financial arrangements comparable thereto; and
 - (e) The price represents the normal consideration for the property sold, unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

2. **Highest and Best Use:** The highest and most profitable use for which the property is adaptable and needed or likely to be needed in the near future. Alternatively, that use from a reasonably probable and legal alternative use, found to be physically possible, appropriately supportive, financially feasible and which results in highest land use.

3. **Improvements:** Buildings or other relatively permanent structures or developments located on, or attached to land.

Area Map

AREA DATA:

County and City Information:

Teton County The subject parcels are found throughout Teton County, Idaho. Teton County is found along the extreme eastern edge of eastern Idaho, near the Wyoming border. It had a population of 6,859 persons in July of 2002. This is a 14 percent increase from the year 2000. Some of the communities in Teton County include Driggs, Victor and Tetonia. Driggs is the county seat and is found along the east side of the county. Victor is located eight (8) miles south of Driggs, and Tetonia, which is located six (6) miles northwest of Driggs. (See Area Map.)

Teton County is surrounded by several mountain ranges. The Big Hole Mountains border the valley on the west and the Teton Mountain Range on the east. Most of the land lying in the valley consists of open land that is in private ownership. This land is used primarily as irrigated agricultural land, wet and dry pasture land and for residential and recreational home sites.

The Teton River bisects the valley floor south to north. It originates from several small creeks and streams west of Victor. All of the creeks in the area flow into this river. Most of these creeks and streams are seasonal and dry up after the spring run-off.

Teton County is located approximately twenty-eight (28) miles west of Jackson Hole, Wyoming. In recent years, many people have moved into Teton County, Idaho, in order to avoid paying high real estate prices in and around the Jackson Hole area.

Teton County is bisected by State Highway 33 and 31. Highway 33 bisects the county north and south. It continues west of Driggs approximately 55 miles to Rexburg. It continues south of Driggs through Victor and then 20 miles east to Jackson Hole, Wyoming. Jackson Pass separates the Teton Basin from the Jackson area.

State Highway 31 runs west of Victor to Swan Valley, Idaho, where it connects with U.S. Highway 26. This highway continues west towards Idaho Falls, Idaho. Victor is separated from Swan Valley by Pine Creek Pass. State Highway 32 runs north of Tetonia through Felt and onto Ashton, Idaho.

Teton County is commonly known as the Teton Basin. It has an elevation that ranges from 6,000 feet to approximately 6,500 feet. Its summer temperatures rarely exceed 85° and its winter lows often drop well below 0°.

City of Driggs Driggs is the county seat of Teton County and had a population of 1,137 persons in July of 2004. Its population has increased 3% since 2004. It has a sizeable commercial district, with a large grocery store, several retail stores, a lumber yard, convenience stores, restaurants, gas stations and other types of businesses. Several banks and professional office buildings are also found within the city.

Driggs is incorporated and has its own municipal government. It is protected by the Teton Sheriff's Department and the Teton Rural Fire District. The city also maintains and operates its own water and sewer systems. The Driggs Sewer District extends to Victor, which is south of the city. All of the properties lying along this trunk line have access to this sewer system.

Driggs has its own small-craft airport. This airport is large enough to accommodate small private jets and light aircraft. Recently, the airport extended its runway and upgraded its aviation electronics.

The primary utilities in the area include the Fall River Rural Electric Cooperative, which provides electrical service, and Qwest, which provides telephone service. Scheduled airline services are available at Idaho Falls and Jackson, Wyoming.

City of Victor Victor is found eight (8) miles south of Driggs and near Parcel 4 and 5. It had a population of 1,216 persons in July of 2004. Its population has increased 151% since 2000. Most of this growth is due to people who are employed in Jackson, Wyoming, moving into an area with relatively less-expensive housing costs.

The City of Victor is incorporated and has access to city sewer and water. This system runs from Driggs south to Victor. Victor has a small commercial district with a grocery store, convenience store and several other minor businesses.

General Economy:

Historically, the economy in Teton Valley has been primarily influenced by agriculture, with some timber harvesting and limited amounts of mining. However, new development and an increase in population have driven the economy toward service industries and tourism.

Most of the employment in the valley is agricultural-related. This work is typically seasonal and usually peaks during harvesting in the fall. Most of the winter employment is found at Grand Targhee, which employs both local and many out-of-state seasonal workers.

Some of the tourist and recreational activities in the valley include skiing at Grand Targhee Ski Resort, cross country skiing and snowmobiling. During the summer, fishing, hiking and horseback riding are the biggest recreational activities. The annual Hot-Air Balloon Festival and summer activities at Grand Targhee Resort also draw a large number of people to the valley.

The general economy of Teton County has remained stable during the 1990's. Personal income in the valley has increased during the past ten (10) years. Land values have also increased in the valley during this period of time. From 2000 to 2004, land values increased 200%.

Teton County has also become a popular location for people seeking a second home in a recreational area. As a result, many home sites and rural subdivisions have been developed along the Teton River and in corridors that have a panoramic view of the Teton Mountain Range. This increase in population has also increased development of new homes and businesses. It has also increased land values in the area.

Neighborhood Map

[REDACTED]

NEIGHBORHOOD DATA

Parcel 3:

This parcel is found on the southeast side of the City of Driggs, in Teton County. It is located directly east of the city's maintenance property.

The area surrounding it is vacant land. The land directly north of it was recently purchased and is slated for development of medium-density residential homes. The property is also bordered on the east and south by vacant land.

The topography of this area is level to undulating. Some of the lower lying areas have a soil that is subject to sub during the late spring and early summer months.

Teton Creek bisects the area northeast and southwest. It is found southeast of the property. On normal snow years when this creek is high, lower areas near the creek sub.

The subject property is now surrounded by land annexed into the City of Driggs. This land is zoned as R-3 land. The subject property has access to electrical and telephone services from the west. City sewer and water services are not found at the property.

OWNERSHIP HISTORY:

Teton County is the recorded owner of Parcels 1, 2, 3, 4 and 5. They have held title to these properties for more than five (5) years.

LEGAL DESCRIPTION:

The legal descriptions of the subject parcels are as follows:

[REDACTED]

[REDACTED]

Parcel 3: Township 5 North, Range 45 East of the Boise Meridian.
Section 36: Portion of NW¼, SE¼.

[REDACTED]

[REDACTED]

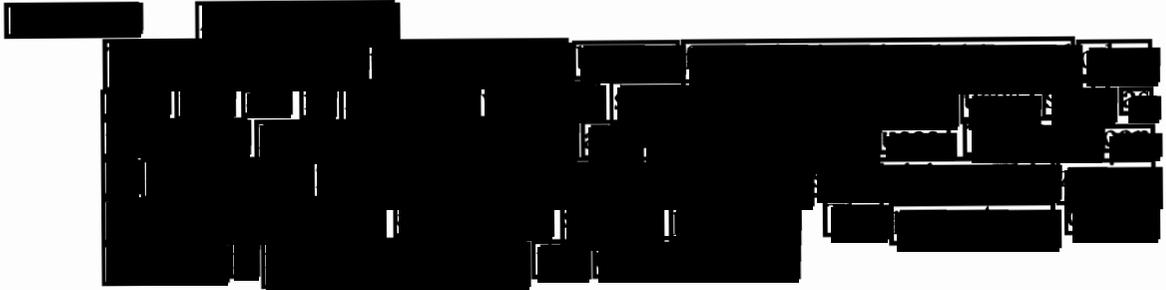

ASSESSED VALUE AND TAXES:

Since all of the properties are owned by Teton County, they are not assessed for tax purposes.

[REDACTED]

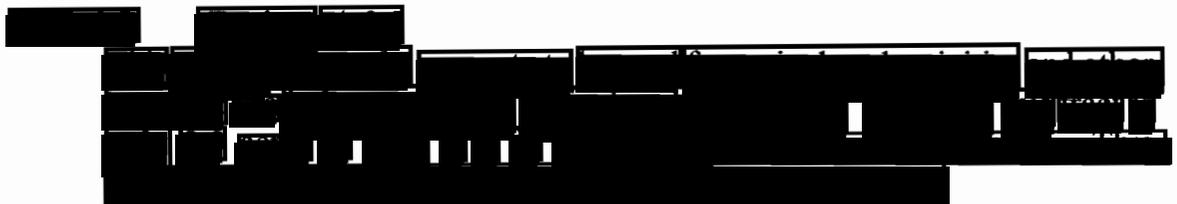

COUNTY ZONING:

According to the Teton Planning and Zoning Department, the subject parcels have been zoned as follows:

Parcel 3: *Zoning: ADR 1.0*

This zoning allows the property to be used as a single or two-dwelling home site with one horse or other farm animal. The 1.0 acre density applies to dwelling per 1 acre. The present use of the property complies with this zoning restriction.

Aerial Map

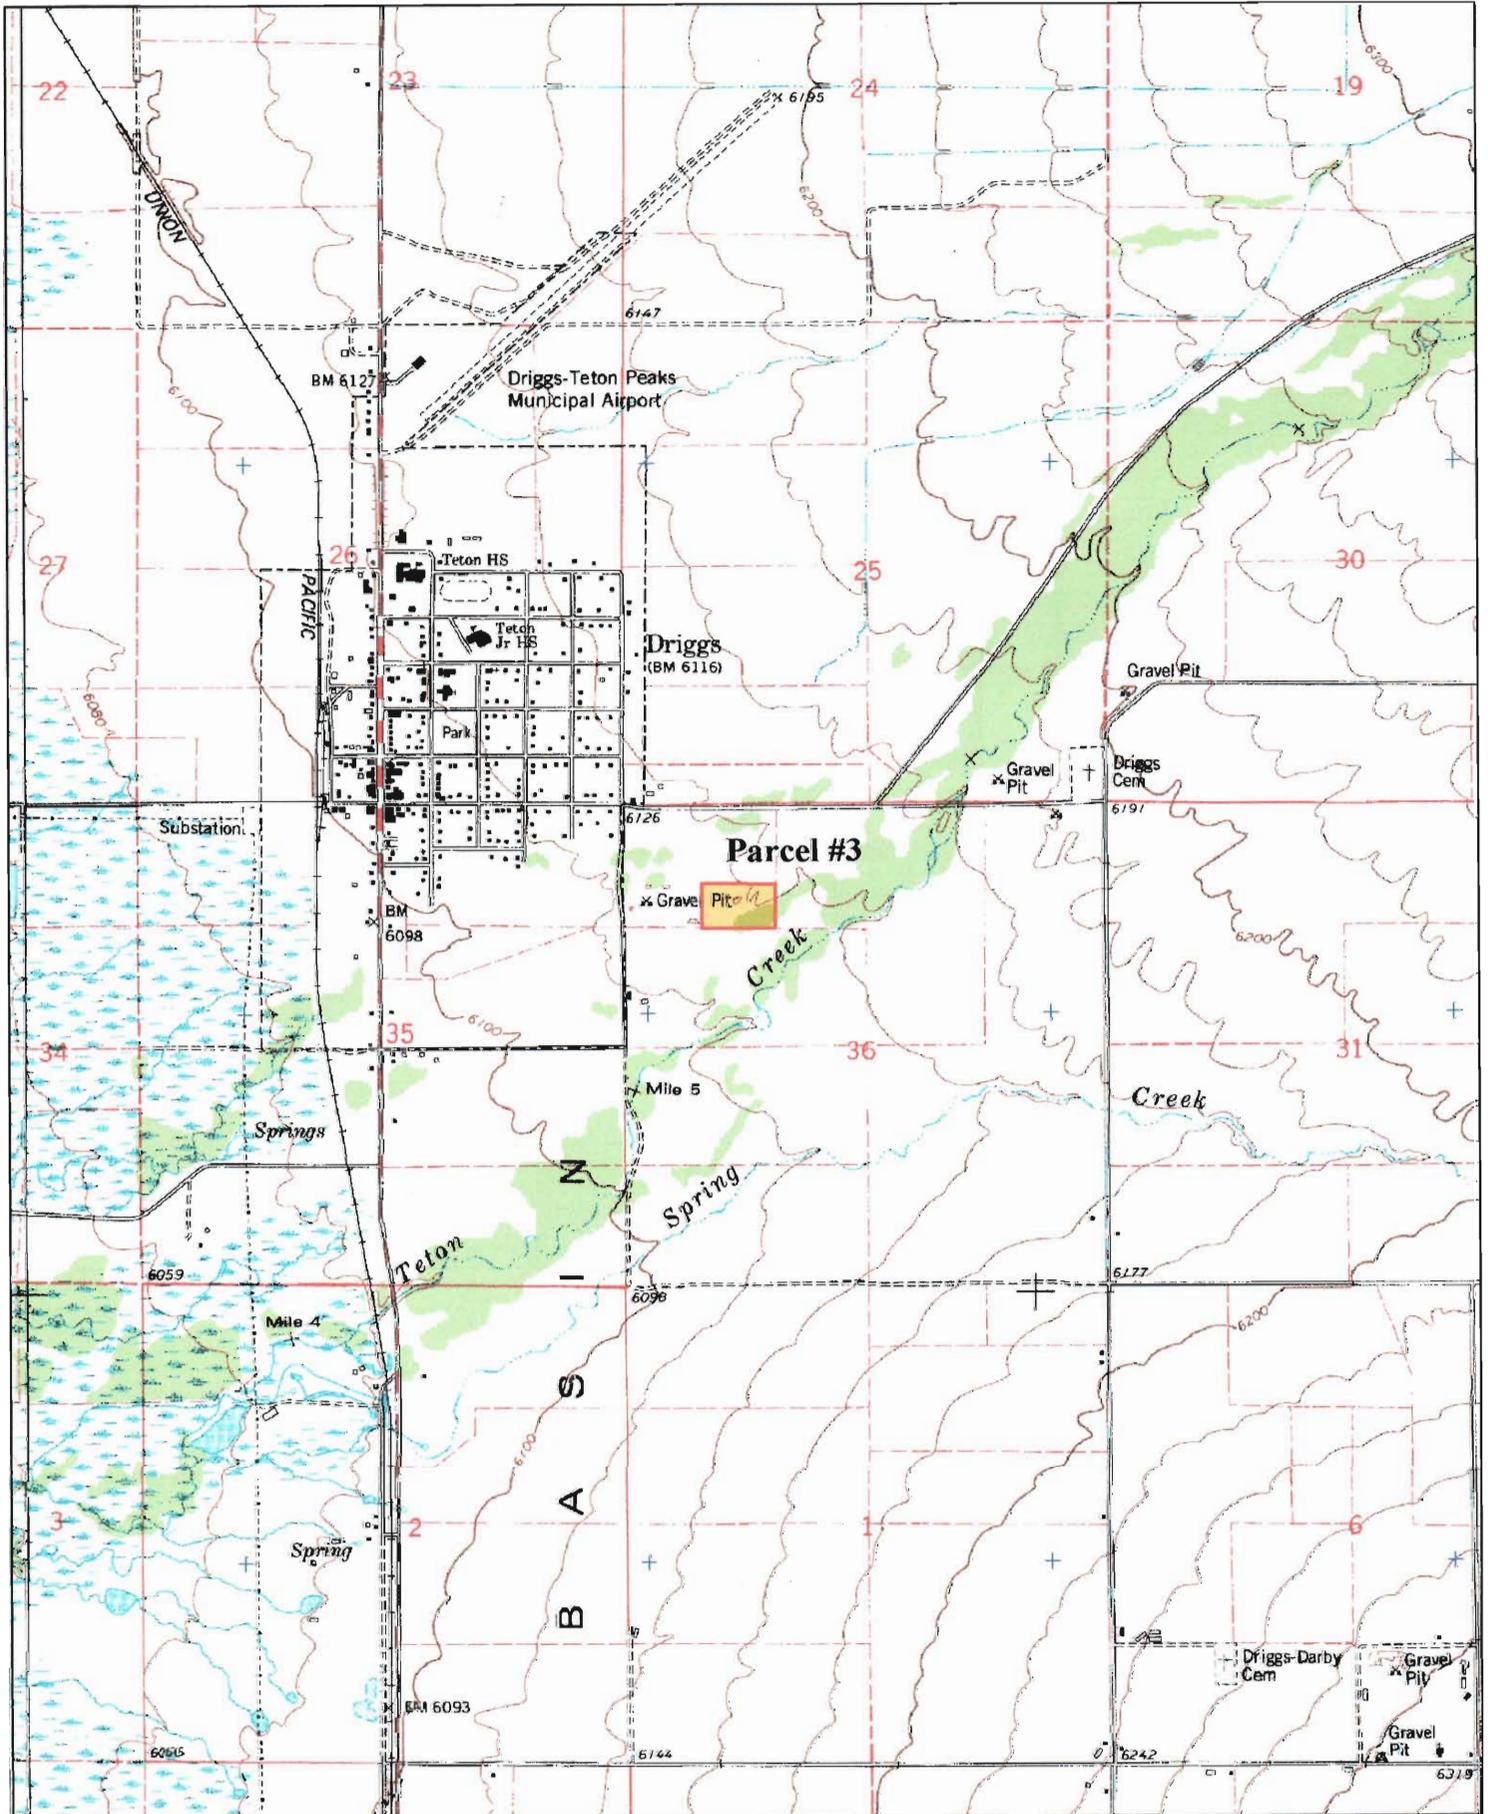

(Parcel 3)

Parcel #3

Topography Map

(Parcel 3)

1. Looking east from the back of the City of Drigg's property at the subject parcel.

2. Looking east across the middle of this property.

3. Looking east along a berm that is along the south side of the property.

4. Looking north across the middle of the property.

5. Looking west from the east side of the property.

Parcel 3:

Location and Size:

This is a rectangularly-shaped tract of land containing 8.50 acres. It is found east of the City of Driggs' Public Works Property, which is at 325 South 5th East. It has 500 feet along the back side of the city's property. It has a length of 747 feet. It is bordered on the north, east and west by vacant land.

Topography and Soil Condition

This property is a depleted gravel pit. This pit is approximately 10 feet deep. Its topography consists of a slope rim around the edge of the pit and a level to undulating base at the bottom. Its ground covering consists of natural grasses and small clumps of new cottonwood trees. There is very little sagebrush on the property. (See Photographs.)

Accessibility

This parcel does not have any legal access. It is landlocked. In the future, it may have access from the property to the north, if that land owner develops a street to it.

View

This property has a view of the immediate area. It has some exposure from Ski Hill Road that is north of it. However, its view from this road is obscured mostly by trees.

Special Features

This property is a mostly depleted gravel pit. It is presently used as a frisbee park. It has good utility as open space land. It is surrounded by cottonwood trees. It is located near Teton Creek.

Utility

The property north of this parcel has recently been purchased by a local developer. They plan to construct residential homes on it. As a result, the subject will eventually be located next to a new development. Based on its size and condition, it has good utility as open space land. Its potential use may be restricted by its low condition and possible subby soil during the late spring and early summer months.

HIGHEST AND BEST USE:

In arriving at an opinion of value, I have analyzed and determined the highest and best use of each parcel. Typically, I would analyze each parcel in its unimproved and improved condition. However, all of the parcels are unimproved. Therefore, I have only analyzed them as unimproved land.

I have used four (4) criteria for determining the highest and best use of each parcel. These four (4) factors, or use criteria, require that the property be:

- (1) Legally Permissible; (2) Physically Possible;
- (3) Financially Feasible; (4) Maximally Productive.

Parcel 3:

Legally Permissible:

This parcel is zoned for ADR 1.0 use. This zoning allows the property to be used as a single or two-dwelling home site with one horse or other farm animal. The present use of this property is in compliance with this use restriction. This designation will not change in the foreseeable future, unless the property is annexed into the city. At that point, it may be changed to R-3, which is a higher density of residential development.

Physically Possible:

This parcel is a depleted gravel pit, which is approximately 10 feet deep. Its slopes mirror the parameter of the property. Its topography is level to undulating at the bottom of the pit. It is currently being used as a frisbee park. It does not have any legal access.

Based on its size and condition, it has very little utility for residential development. It does have utility with the land surrounding it for open space or for recreational utility.

Financially Feasible:

This property is surrounded by land that has speculative development potential. It is located near Teton Creek. Based on its size and location, it has utility with the use of the land adjacent to it.

Maximally Productive:

This is a landlocked tract of land. It is found near other land that has potential for residential or recreational development. Based on its size and location, its highest and best use is open space land or recreational land used in conjunction with the land adjacent to it.

APPROACHES TO VALUE:

Three approaches to value are generally considered in arriving at an estimate of the value of Real Estate. These are called Sales Comparison, Cost and Income approaches.

The application of the Sales Comparison Approach produces an estimate of value by comparing the subject with similar properties of the same type and class that have sold or are currently offered for sale in the same or complementary areas. The sale prices of properties, deemed most comparable, set the range in which the value of the subject property will fall. When properly applied, this approach generally allows for both depreciation and appreciation in value.

In the Cost Approach, a value is estimated by computing the present replacement cost of the improvements and then applying an appropriate depreciation rate to arrive at a depreciated value of the improvements. This depreciation rate is concluded either from comparing sales for similar types of properties to their replacement cost, or from the various accepted Age-Life methods, or both. This is then added to the land value, found by comparison in the market, to arrive at a value for the property.

This approach is based on the assumption that the replacement cost is the upper limit of value. This approach is best used when the improvements are new or near new and are proper improvements for the property. As improvements increase in age and as depreciation accumulates, the validity of this approach lessens.

The Income Approach is a process of developing the net rental income from a property into an indication of value. This is accomplished by analyzing the relationship of net rental incomes from similar properties to their selling prices in the market. The relationship between this net income and the selling price is called a capitalization rate. The net income is divided by the capitalization rate to show value.

I have considered all three (3) approaches herein. However, I have only used the Sales Comparison Approach in arriving at an opinion of value for each parcel. I have not used the Cost or Income Approaches because each parcel is unimproved land.

VALUATION SECTION

I have used the Sales Comparison Approach to arrive at an opinion of value for each parcel of land. I have investigated the market in order to find sales of properties that are similar to each parcel in likeness and quality. I have then compared these sales to each parcel in order to arrive at an opinion of value.

All of the parcels are found in a market in which land values are increasing. Therefore, I have looked for the most recent sales to compare with each parcel. I have made some adjustments for sales that are older than one (1) year. In some cases, the most recent sale is one year old. I have not made adjustments to these sales if there have been no additional sales in the area that indicate an increase in value.

I used sales as close to the subject parcels as possible. During my investigation, I found that properties in one part of the county have more similarity than they do with sales in other parts of the county. For example, small tract sales, north of Driggs, have a high value because they are in the "view corridor" and have a view of the Grand Tetons. Sales around Victor have a different value because of the strong demand for small acreage sites in that area. This is due largely because of its proximity to Jackson. Therefore, I have tried to find sales in the immediate area of influence for each parcel in order to make them comparable.

The sales found have similar "highest and best use" to each parcel. Most of them have potential for either residential or recreational development. However, each sale is unique and requires some adjustment when compared with each parcel.

I have used a *qualitative analysis* to compare each sale to the individual parcels. Under this analysis, I isolate various factors that affect value. I then compare each sale to the subject parcel using these factors and eliminating any differences with a +/- . Finally, I bracketed the weighed sales to arrive at an indication of value.

I have also analyzed each sale to determine if adjustment is required to make it a "cash equivalent" sale. Each sale has been analyzed to see if any conditions surrounding it make it dissimilar to the subject. Finally, all of the sales have been analyzed to see if they need adjustment for time. A few sales require this adjustment.

I have analyzed each parcel below. On the next page, I have set forth a "List of Sales." These are the sales used to arrive at an opinion of value for each parcel. I have confirmed all of the sales with either the buyer, the seller or through the Multi-listing Service. I have also obtained a Warranty Deed on each sale. My analysis of each parcel is found on the following pages.

List of Sales

<i>SALE</i>	<i>BUYER</i>	<i>DATE</i>	<i>PRICE</i>	<i>SIZE (Acres)</i>	<i>PRICE (Per Acre)</i>	<i>LOCATION</i>	<i>POTENTIAL USE</i>

11	Victor Mountain Retreat	Jan-05	\$405,000	20.00	\$20,250	North of Victor	Residential or Planned Unit Development
12	Lee	Nov-05	\$65,000	2.51	\$25,896	450 S. 39th E.	Residential Development
13	Jacobs	Nov-05	\$78,000	2.84	\$27,465	200 W. Hwy. 31	Residential Development
14	Johnson	Apr-05	\$79,000	2.70	\$29,259	100 W. Cedron Rd.	Residential Development

I have used three (3) sale to arrive at an opinion of value for each parcel. These sales indicate the current value of each parcel as of the effective date of this appraisal, which is March 3, 2006. [REDACTED]

Parcel 3:

I have used Sale #6 through 8 to arrive at an opinion of value for this parcel. The sales considered are found in relatively close proximity to the subject. All of them are located east of Driggs. Unlike the subject, all of the sales have access. I have made an adjustment for this difference.

I have adjusted Sale #8 17.85% for time. I have used the sale directly west of it (Sale #7) to make this upward adjustment.

In this analysis, the factors that affect value are location, topography, access and amenities to the site. The following is how these sales compare to the subject parcel.

Location: All of the sales are similar to the subject in location. They are all found on the east side of Driggs. Sale #7 and #8 are near gravel extraction and Teton Creek. Sale #6 is found near the Darby Townsite, which is similar to the subject area.

Topography: The subject property is a partially depleted gravel pit. All of the sales are level tracts of land. Therefore, I conclude that all of the sales are superior to the subject based on this condition.

Access: All of the sales are accessible from a county road. The subject, on the other hand, is land-locked. Because it has no legal access, I conclude these sales are superior to it.

Amenities to the Site: The subject has potential as a gravel pit or as open space. Sale #7 and #8 have good potential for gravel extraction. In fact, they were purchased for this use. Sale #6 has potential as a home site. Therefore, I conclude it has a higher value because it is found in an area with other residential dwellings. Sale #7 and #8 are similar to the subject because they are located in an area with other gravel extraction operations.

In addition to these sales, the appraiser discovered a fourth sale in the area. Action Excavation purchased a 20-acre tract of land southeast of the Driggs Cemetery in Section 31 of Township 6 North, Range 45 East of the Boise Meridian. According to the owner, he purchased this land for \$10,000 per acre. This sale occurred in August of 2005. The following is the conclusion of my analysis.

Sales Adjustment Table

Adjustments	Subject	Sale 6		Sale 7		Sale 8	
Sale Price:	-		\$73,000		\$220,000		\$140,000
Number of Acres:	8.50		5.00		20.00		15.00
Price Per Acre:	-		\$14,600		\$11,000		\$9,333
Financial Terms:	-		0		0		0
Date of Sale Adj.:	N/A		Feb-05		Mar-05		May-04
Adj. for Time:	N/A		0.00%		0.00%		17.85%
Condition of Sale			-		-		-
Adjustment:	N/A		0		0		0
Total Adjustment:	N/A		\$14,600		\$11,000		\$10,999
Other Adjustments:							
Location:	East of Driggs	East of Darby	Similar	1 Mi. East of Driggs	Similar	1 Mi. East of Driggs	Similar
Topography:	Gravel Pit	Level	+	Level	+	Level	+
Access:	Land Locked	County Road	+	County Road	+	County Road	+
Amenities to the Site:	Gravel Pit or Open Space	Residential Homesite	++	Gravel Extract or Res.	Similar	Gravel Extract or Res.	Similar
Overall Comparability:			++++		++		++

Comparable	Price Per S.F.	Overall Comparability
<i>Subject</i>	-	
Sale 8:	\$10,999	++
Sale 7:	\$11,000	++
Sale 6:	\$14,600	++++

Based on the above, I conclude the subject has an indicated value less than \$11,000. The unconfirmed sale of Action Excavation is \$10,000 per acre. I conclude the subject would probably have value near this figure. Although it is landlocked, it does have good potential for open space. Furthermore, it is found near land that has good potential for residential or recreational development. Therefore, I conclude it has an indicated value as follows:

8.50 Acres of Land @ \$10,000 Per Acre

Called At: \$85,000

Remarks	Land purchased solely for gravel extraction.

CERTIFICATION AND STATEMENT OF LIMITING CONDITIONS:

The Appraiser certifies that, to the best of his knowledge and belief:

1. The statements of fact contained in this report are true and correct.
2. The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and are my personal, impartial and unbiased professional analyses, opinions and conclusions.
3. The Appraiser has no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
4. The Appraiser has no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
5. My engagement in this assignment was not contingent upon developing or reporting predetermined results.
6. My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction of value that favors the cause of the client, the amount of the value, the attainment of a stipulated result, the occurrence of a subsequent event directly related to the intended use of this appraisal.
7. My analyses, opinions, and conclusions were developed, and this report has been prepared in conformity with the Uniform Standards of Professional Appraisal Practice.
8. I have visited the property that is the subject of this report. However, my visit was cursory in nature.
9. No one provided significant real property appraisal assistance to the person signing this certification.
10. All conclusions and opinions concerning the real estate that are set forth in this letter were prepared by the Appraiser(s), whose signature appears on this report. No change of any item in this report shall be made by anyone other than the Appraiser, and the Appraiser shall have no responsibility for any such unauthorized change.

CONTINGENT AND LIMITING CONDITIONS:

The certification appearing in this report is subject to the following conditions and to such other specific and limiting conditions as are set forth by the Appraiser.

1. The Appraiser assumes no responsibility for matters of a legal nature affecting the property or the title thereto, nor does the Appraiser render any opinion as to the title, which is assumed to be good and marketable. The property is considered to be under responsible ownership.
2. Any sketch or plat map attached may show approximate dimensions and is included to assist the reader in visualizing the property. The Appraiser has not made a survey of the property.

3. The Appraiser is not required to give testimony or appear in court because of having made the inspection with reference to the property in question, unless arrangements have been previously made thereto.

4. Any distribution of the valuation in this report between land and improvement applies only under the existing program of utilization. The separate valuations for land and building must not be used in conjunction with any other appraisal and are invalid if so used.

5. The Appraiser assumes that there are no hidden or unapparent conditions of the property, subsoil, or structures, which would render it more or less valuable. The Appraiser assumes no responsibility for such conditions, or for engineering which might be required to discover such factors.

6. Information, estimates, and opinions furnished to me and contained in this report were obtained from sources considered reliable and believed to be true and correct. However, no responsibility for accuracy of such items furnished can be assumed.

7. The description of the property herein is stated for the purpose of arriving at an opinion of value. It should not be used for any other purpose, such as a description for a prospectus or for describing the property for sale. All parts of this appraisal should only be construed as applying to the opinion of value herein and should not be used separately for specific information.

8. Disclosure of the contents of this report is restricted to the intended users of the report. No other individual is authorized by the appraiser to use this report.

9. Unless otherwise stated in this report, the existence of hazardous material, which may or may not be present on the property, was not observed by the Appraiser. The Appraiser has no knowledge of the existence of such materials on or in the property. The Appraiser however, is not a qualified environmental auditor who has the skill to detect such substances. The presence of substances such as asbestos, urea-formaldehyde foam insulation, or other potentially hazardous materials may affect the value of the property. Any latent environmental problem within or underneath the property may also affect its value. The value estimate herein is predicated on the assumption that there is no such material on or in the property that would cause a loss in value. No responsibility is assumed for any such conditions, or for any expertise or engineering knowledge required to discover them. The client is urged to retain an expert in this field, if desired.
